Questions to ask ourselves:

What is our overall goal in our questionnaire?

What types of questions are missing that will help back up our ideas?

What answer do you expect to get from asking that particular question?

Do any questions repeat the same thing?

Could anything be said better or differently?

Do our possible answers (if given make sense)?

Are these questions that the average student would be able to answer or know?

Survey Question Checklist

- * You list instructions on the survey/questionnaire
- * You make your intentions for creating the survey very clear
- * You don't ask for personal information unless you need it.
- * You keep the questions short and concise
- * You ask only one question at a time (try not to add "and" to the question, just make 2 separate questions)
- * You make sure the questions are unbiased (fair or neutral)
- * You ask questions that can be answered by students
- * You order/group questions according to the subject that they deal with
- * The survey is presented in a clean and organized layout
- * You test the survey questionnaire in a small group and then present it to the rest of your population.
